PROMIXCO USA CORP.

PROMIXCO began in 2000 as a small trading business. Over the years, through hard work and commitment, it has carved out a niche as an import substitute medical device manufacturer. The company is recognized by the government, industry associations, and medical institutions as a reliable partner. With a turnover in the billions of BDT, PROMIXCO has expanded its footprint to 60 countries with over 1000 products. It also has an overseas office in the USA for Pan-American operations. Known for quality products and services, PROMIXCO holds FDA, CE, ISO, FSC, BCSIR, DGDA, and GMP certifications.

PROMIXCO's Gazipur facility produces high-end, import-substitute medical devices. The company's 'Stylo' furniture line is renowned for quality office furniture. As a pioneer in medical device manufacturing in Bangladesh, PROMIXCO collaborates with the government and local businesses, leading to the inclusion of this sector in the National Industrial Policy, 2022. During the COVID-19 pandemic, PROMIXCO provided sanitizers, masks, and gloves to various institutions free of cost, a gesture widely recognized and appreciated. The company adheres to sound governance practices regarding employee rights, environmental sustainability, and regulatory obligations.
